INTRODUCTION

The State Board of Refrigeration Contractors was created by the North Carolina Legislature to protect the public by taking steps to ensure that refrigeration contractors are competent in their profession. In order to achieve this goal, minimum standards and requirements were established by the Board for entry into the profession. Passing the licensing examination is one of the requirements for obtaining a license as a Refrigeration Contractor.

This is an open book examination. Each applicant may use any books that he or she brings to the examination. The examination is designed to measure how well a candidate has mastered the subjects covered on the General Outline of the examination on the next page.

The wording of all questions is straightforward and plain, and there is no intent to mislead. Each question has one correct answer. Therefore, the applicant should read each question and its answer choices thoroughly and carefully. Then select the one answer that appears to be most nearly correct.

In order to pass the qualifying examination, an applicant is required to pass all parts of the examination within the same one-year period and within no more than three consecutive attempts. Each time an applicant takes the examination, he shall take all parts for which he does not currently have valid passing grades. If the applicant fails to pass all parts within one year or within three consecutive attempts (whichever period is shorter), any passing grades for individual parts shall no longer be valid and the applicant must start over by re-taking all parts of the examination.

Applicants are urged to carefully study all of the information contained in this booklet as part of their preparation to take a qualifying examination.

An unjustified refusal to sign appropriately documented forms provided by the applicant will lead to an appearance before a Board review official.

The Board understands that on occasion employees are dismissed due to lack of skill, tardiness, substance abuse, theft or other reasons. In such circumstances, you may wish to provide additional information to the Board by separate letter. The Board will consider all such information within the limits of its duty and authority.
